Provision has been made for amortisation on the intangible assets of the Group in the amount of approximately HK\$8,130,000 as the Board has adopted a prudent approach and determined that amortisation on the intangible assets provision should be made on the intangible assets of the Group.

The intangible assets of the Group are comprised of the IPTV permit, namely the "Broadcast of Audio-Video Program On Web Permit" (信息網路傳播視聽節目許可證) (the "Permit") currently held by Guangzhou Wavecom Communications and Advertising Limited ("Guangzhou Wavecom"). Guangzhou Wavecom is a wholly-owned subsidiary of the Company and possession of the Permit allows Guangzhou Wavecom's subsidiary, South Pearl Limited, to operate the Group's IPTV division in the greater southern China region. The Permit has been granted by Guangzhou Television Broadcast Microwave General Station ("Guangzhou Television Station") to Guangzhou Wavecom. Possession of the Permit allows, and is a prerequisite to South Pearl Limited being able to act as the exclusive service provider of Guangzhou Television Station's programmes, advertising and other IPTV services within the greater southern China region. The Permit commenced on 1 October 2007 and will expire on 30 September 2015.

The Group's gross profit margin is increased from approximately 68% for the nine months ended 30 September 2011 to approximately 76% for the current period.

The Group's remuneration policies are in line with the prevailing market practices and formulated on the basis of performance and experience of the employees. The salary and related benefits of the employees are rewarded on a performance related basis and the general remuneration structure of the Group is subject to review annually.

OPERATIONAL REVIEW

During the period of the last three months under review, the Group had engaged into continuous discussions in the PRC to further enlarge its revenue base through the further development of the Group's IPTV division which currently provides IPTV value added services to the greater southern China region. Based on the believe of the Board and management, the Company has a sufficient level of operations in its IPTV value-added services and to operate its business as a going concern which serves as a development platform for the expanded businesses that the Group would engaged into. The Company does not have any financial difficulties to an extent which may seriously impair the Company's ability to continue its business. The Company also has, in addition to those assets held by the IPTV division, sufficient assets to operate its business due to the continuing support of the Company's immediate holding company in the foreseeable future.

The Board, looking forward, is contemplating expanding the investment operations of the Group, which will allow the Company to focus on synergy project investments which shall derive value for the Company's shareholders, and pave the way for the Company's future growth, both in terms of revenue streams and profits achieved from its business operations.

The Group announced in 12 May 2012 whereby, a letter of intent was signed with a PRC entity to cooperate in the value-added business by using satellite media to cover the expansion. Unfortunately, due to market condition of China, and the financial crises of the European Community, such services faced prolonged discussions and extensive management involvement. The Board decided on 11 October 2012 to terminate the current negotiation, and instead review the possibility to partner with one of the existing southern china operator to extend our platform of value-added services instead.

The Board is confident that based on the progress of the current discussions, substantial improvements in our level of services for the existing captive customer base is anticipated.

Performance of operating divisions

Information Technology Division

Since 2010, the Company entered into strategic alliance with a local internet carrier to deploy the iPTV services to selective blocks of subscribers as trial run, to test the maturity of the system, and the interactive features of the Internet in order to reach critical masses following the launch.

Due to the complexity of the regulatory frame-work of IPTV in China consists of a combination of traditional TV regulatory measures, access regulations, and regulation of resources in the IP platform. The Company has endeavored to satisfy the customers' expectations, and navigate the regulatory framework through prudent and careful assessment, prior to engage itself into large scale investment and marketing campaign to promote the services.

Besides, continuous market studies has been conducted by the Group's strategic team focusing on residential market and high profit customer base, which the Company had been trying to develop by engaging in various discussions with PRC developers to service their "residential communities" with value-added services on video and IP applications. The Management believes that it can be achieved better performance in the next two years with better deployment of technologies and service coverage.

Financial Consultancy

Apart from the aforementioned operations, the Group continues to research, develop and explore investment opportunities which are strategic to its business operations and which will contribute significantly to the return of the Company's shareholders.

With the acquisition of Vega International Group Limited, which is principally engaged in the provision of services in corporate finance and investment, project planning and development, technology project brokerage services, corporate development services, management consulting and post-acquisition advisory and professional management services, the Group is researching, developing and exploring further opportunities for development in the corporate finance sector which will further contribute to the current revenue streams generated by the Group.

In relation to the corporate finance sector, the Board is planning to devote more time and resources towards expanding the provision of financial consultancy services to business sectors that complement and have synergy with the household consumers and media services that the IPTV division of the Company is presently pursuing. The Board envisages that such services, if agreed, will encompass the establishment of financial advisory offices which will provide investment, financial and project management advise to other companies. In terms of these consultancy services, they will be negotiated in the normal course of business and shareholders will be kept informed of this division as it progresses.
